

# NCF OFFER

## FROM ANTHONY COLLINS SOLICITORS

As leaders in providing sector-specialist legal advice on all aspects of social care, we help clients minimise the burden of regulatory oversight, support you in meeting your corporate responsibilities and make commercial opportunities work for you, so that you can concentrate on delivering high quality care to the people you support.

*"The approach applied by ACS matched all of our core values, ambition, respect, courage, integrity and partnership and played a key role in reaching contract signature."*

**Luke Joy-Smith**, Managing Director, Discovery (subsidiary of Dimensions UK).

We understand that health and social care providers are operating in a very challenging financial environment with an increased focus on regulation, of which we are at the forefront. Some of our recent projects helping care businesses grow and develop while navigating these challenges include:

- **Working with providers to challenge the assumption that the size of a service determines the quality of care provided to individuals.** All specialisms should benefit from the flexibility to build services of different sizes in suitable locations, whether they are designed for learning disabilities, dementia or extra care.
- **Being at the forefront of the NMW issues** troubling the sector. Helping with lobbying to Government, negotiations for a sustainable long-term solution, and assisting individual providers with staying compliant.

### OUR OFFER TO NCF MEMBERS INCLUDES:

- a reduced rate on legal fees
- a fixed price package for housing with care and care home property development projects
- the latest health and social care legal news, e-briefings, and events from [www.anthonycollins.com](http://www.anthonycollins.com) | <https://newsroom.anthonycollins.com>
